IR CONSULT

Investor Relations & IPO-Consulting

**Experience
is our Basis**

**Your Benefits
are Our Goals**

**Your Success
with IR CONSULT**

IR CONSULT has been working as a specialist for active and fundamental investor & creditor relations, IPO and capital market advisory since 1994.

The company's founder, ALEXANDER VOLLET, was an equity analyst at top European banks for 8 years prior to that, where he was in charge of small and mid-caps. He was also responsible for capital increases and IPOs.

In 1994 he founded IR CONSULT. Since then its highly experienced team has numbered among the leading investor & creditor relations, IPO and capital market specialists in Germany. Additionally we are active at the DVFA and bdvb and have closed a number of national and international co-operations.

IR CONSULT has first-class personal contacts to banks, analysts, fund managers and asset managers Europe-wide as well as to the financial and capital market press in Europe.

Our reservoir of experience is based on more than 20 IPOs (100 of the team) as well as on over 50, in some cases extremely longstanding, remits from stock market-listed small- and mid-caps out of different sectors and indices.

Please contact [IR CONSULT](http://www.ir-consult.com).

We are pleased to help you too:

- fundamental investor & creditor relations
- integrated IPO advisory (equity & bonds)
- Basic Investors' Information (PIP, PRIIP)
- independent capital market consulting

1. Investor & Creditor Relations

fundamental and active

IR CONSULT has developed an active and fundamental investor & creditor relations approach that focuses strongly on the capital market comprising:

- target group-optimized reporting
- detailed fact book (www.fact-book.de)
- established contacts in Europe
- regular presentations and road-shows
- investors targeting
- investor relations check
- online IR

After an individual discussion to determine your specific needs and plans IR CONSULT does then draw up an action plan tailored to your individual situation.

As IR CONSULT also implements these measures autonomously and successfully, management is left with sufficient time to concentrate on your operational tasks. This is intelligent outsourcing.

2. IPO Consulting (www.ipo-advisor.com)

optimally prepared for the capital market

You can profit from our experience with more than 20 own IPOs and a number of capital increases.

With the check of your flotation eligibility (www.boersenreif.de) we provided a company valuation, a to-do-list with all necessary preparations as well as a concrete project schedule.

IR CONSULT significantly enhances your success chances (IPO or bonds) thanks to its targeted preparation of the various activities involved including equity story, IPO communication, organization and post-placing investor & creditor relations.

3. Capital Market Consulting

professional and independent

You gain significant advantages in your search for investors or even at a planned exit thanks to IR CONSULT's independent consulting services. In this way, you profit from our know-how as well as from the contacts to investors that are carefully selected to suit your needs.

We are also able to accelerate the decision-making process carried out by the investors concerned thanks to our documentation, a persuasive equity story and our capital market coaching.
